Prototype 1.5.0_pre0

String
- sub()
- scan()
- truncate()
- strip()
- gsub()
- times()
- stripScripts()
- extractScripts()
- evalScripts()
- escapeHTML()
- unescapeHTML()
- toQueryParams()
- toArray()
- camelize()
- inspect()
- parseQuery = toQueryParams()

Template
- Pattern()
- initialize()
- evaluate()

prepareReplacement()

Prototype
- Version
- ScriptFragment
- emptyFunction()
- K()

Object
- inspect()
- extend()

Function
- bind()
- bindAsEventListener()

Try
- these()

Class
- create()

Number
- toColorPart()
- succ()
- times()

$R()
Creates an ObjectRange

ObjectRange
- _each()
- initialize()
- include()
- merge()
- toQueryString()

PeriodicalExecuter
- initialize()
- registerCallback()
- onTimerEvent()

Selector
- initialize()
- parseExpression()
- buildMatchExpression()
- compileMatcher()
- findElements()
- toString()

Abstract.TimedObserver
- initialize()
- registerCallback()
- onTimerEvent()

Abstract.EventObserver
- initialize()
- registerCallback()
- onElementEvent()
- registerFormCallbacks()

Enumerable
- each()
- all()
- any()
- collect()
- detect()
- findAll()
- grep()
- include()
- inject()
- invoke()
- max()
- min()
- partition()
- pluck()
- reject()
- sortBy()
- toArray()
- inspect()
- zip()
- map = collect()
- find = detect()
- select = findAll()
- member = include()
- entries = toArray()

Toggle
- display()

$()
getElementById

$$()
Returns an Enumerable/Array of elements

$A()
Creates an Enumerable/Array

$H()
Creates an Enumerable/Hash

Array
- from()
- _reverse()
- _each()
- clear()
- first()
- last()
- compact()
- flatten()
- without()
- indexOf()
- reverse()
- shift()
- inspect()

Hash
- _each()
- keys()
- values()
- merge()
- toQueryString()
- inspect()

Document
- getElementByClassName()

Abstract

Abstract.Insertion
- initialize()
- contentFromAnonymousTable()

Insertion

Insertion.Top
- initializeRange()
- insertContent()

Insertion.Bottom
- initializeRange()
- insertContent()

Insertion.After
- initializeRange()
- insertContent()

Insertion.before
- initializeRange()
- insertContent()

Element (singleton)
- visible()
- toggle()
- hide()
- show()
- remove()
- update()
- getHeight()
- classNames()
- hasClassName()
- addClassName()
- removeClassName()
- cleanWhitespace()
- empty()
- childOf()
- scrollTo()
- getStyle()
- setStyle()
- getDimensions()
- makePositioned()
- undoPositioned()
- makeClipping()
- undoClipping()

Position
- prepare()
- realOffset()
- cumulativeOffset()
- positionedOffset()
- offsetParent()
- within()
- withinIncludingScrolloffsets()
- overlap()
- clone()
- page()
- absolutize()
- relativize()
- includeScrollOffsets()

$F()
same as Form.Element.getValue()

Form
- serialize()
- getElements()
- getInputs()
- disable()
- enable()
- findFirstElement()
- focusFirstElement()
- reset()

Form.Element
- serialize()
- getValue()

Form.Element.Serializers
- input()
- inputSelector()
- textarea()
- select()
- selectOne()
- selectMany()

Form.Observer
- getValue()

Form.EventObserver
- getValue()

Form.Element.Observer
- getValue()

Form.Element.EventObserver
- create()

Ajax.PeriodicalUpdater
- initialize()
- start()
- stop()
- updateComplete()
- onTimerEvent()

Event
- element()
- isLeftClick()
- pointerX()
- pointerY()
- stop()
- findElement()
- _observeAndCache()
- unloadCache()
- observe()
- stopObserving()
- observers()
- KEY_BACKSPACE
- KEY_TAB
- KEY_RETURN
- KEY_ESC
- KEY_LEFT
- KEY_UP
- KEY_RIGHT
- KEY_DOWN
- KEY_DELETE

Ajax
- getTransport()
- activeRequestCount()

Ajax.Responders
- responders[]
- register()
- unregister()
- dispatch()
- onCreate()
- onComplete()

Ajax.Base
- setOptions()
- responseIsSuccess()
- responseIsFailure()

Ajax.Request
- initialize[]
- request()
- setRequestHeaders()
- onStateChange()
- header()
- evalJSON()
- evalResponse()
- respondToReadyState()
- dispatchException()

Ajax.Updater
- initialize()
- updateContent()

Element.ClassNames
- initialize()
- _each()
- set()
- add()
- remove()
- toString()

Field
- clear()
- focus()
- present()
- select()
- activate()
